INSTRUCCIONES

Este manual es la guía para la información de índice sobre todos los estándares paramétricos presentados en la Biblioteca de Display EngView. Está destinado a ayudar a los usuarios de EngView Package & Display Designer Suite en su búsqueda de estándares y tipos de diseño apropiados.

El manual consta de dos secciones: (1) Cartón corrugado y (2) Display y estructuras POP / POS de Cartón Estructural.

Dependiendo de los tipos específicos de los diseños incluidos, cada sección se divide en grupos y subgrupos de diseños. Sus estructuras son idénticas a las de las carpetas de archivos y directorios de la Biblioteca de Pantallas y el Sistema de Ayuda del Índice de Biblioteca de EngView Package & Display Designer Suite.

Un ejemplo de diseño de una página de índice:

Todos los diseños aquí mostrados son paramétricos, esto quiere decir que pueden ser modificados en sus medidas y a su vez cambian todos los componentes del Diseño.

Pueden llevar impresión flexográfica a 2 tintas o impresión digital directa. Los diseños pueden ser modificados y personalizados a la necesidad de cada cliente o producto.
